

MOORHEAD WATER TANK

PROJECT INFORMATION

Project Location
Moorhead, Minnesota

Project Completion Date
August 2018

Owner
KLM Engineering, Inc.

Applicator
Classic Protective Coatings

FEATURED PRODUCTS

Series 91-H2O Hydro-Zinc
Series 1075 Endura-Shield II
Series 700 HydroFlon
Series N140 Pota-Pox Plus

PROJECT DETAILS

When the City of Moorhead, Minn., finished their 500,000-gallon tank project, they were so excited about the result that they held an unveiling ceremony. The tank's mural was designed by local artists with images, colors and silhouettes reflective of the Moorhead community. The tank was painted inside and out using Tnemec coating and lining systems, including the topcoat Series 700 HydroFlon for extra protection against UV light degradation.
