

HIGH-PERFORMANCE LININGS FOR MOBILE TANKS & FLUID TRANSPORT

SUPERIOR IMMERSION PROTECTION

SPECIAL EXPERTISE GOES INTO EACH LINING BEFORE THEY GO ON

Tnemec Company is known for extensive research, development and testing of some of the most innovative and effective coatings and linings in the industry. Immersion service for a variety of fluid storage and transport applications is a particular area of specialty.

Research, rigorous testing and in-field performance analysis help ensure that Tnemec linings continue to provide superior protection and corrosion resistance, extending life cycles and maintenance intervals for tankers, trailers, rail cars, containers, pipes, pumps and storage tanks.

PRODUCT GUIDE

SERIES 61 TNEME-LINER

- Resistant to a variety of mild acids, crude, flowback and solvents
- Two-coat application
- No specialized application equipment required
- Can be used as a primer under Tank Armor products

SERIES 120 VINESTER®

- Resistant to a variety of concentrated acids
- Two-coat application
- No specialized application equipment required

SERIES 141 | 142 EPOXOLINE®

- Excellent corrosion resistance
- Single high-build coat
- Rapid application for reduced labor costs and downtime
- No specialized application equipment required
- Series 142 provides greater abrasion resistance

SERIES 307 TANK ARMOR®

- Cost-effective choice for corrosion control in brine, mud, backflow tanks, crude oil and finished fuels
- High-build protection in a single coat
- Micro-fiber reinforcement for enhanced film integrity

SERIES 322 TANK ARMOR

- Single-leg airless spray application
- Excellent chemical and corrosion resistance for finished fuel immersion service
- Can be applied in one or two high-build coats

SERIES 335 | 350 TANK ARMOR

- Especially effective for petroleum and chemical storage applications
- Thick-film, reinforced and flexibilized lining resists physical/mechanical stresses
- One coat, quick cure for rapid return to service

SERIES 391 TANK ARMOR

- Excellent abrasion, chemical and corrosion resistance in more aggressive exposures
- One coat, quick cure for rapid return to service
- Reduced labor costs, downtime
- VOC-compliant, no solvents

LININGS DESIGNED TO WITHSTAND ACID, FRAC AND DRILLING FLUIDS

It takes an exceptional, highly durable substrate lining to resist concentrated acids and acid/solvent blends. The high-build characteristics, robust formulations and resilience of Themec linings make them the perfect choice for uncompromised performance and

long-term resistance to corrosion, abrasion or damaging fluids.

These spray-applied linings provide smooth, seamless coverage on edges, welded seams, baffled walls, piping and sumps.

SERIES 120 VINESTER
SERIES 391 TANK ARMOR

BARRIER OF PROTECTION FOR HAULING OR STORING FINISHED FUELS

Themec has successfully served the oil industry for decades, developing a variety of effective linings and coatings. Some are formulated especially for extended immersion service in condensate trailers and enclosed tanks.

Petroleum, crude oil and petroleum by-products present very unique containment challenges.

Themec linings form a dense, impermeable barrier that prevents severe substrate degradation, which can result in costly repairs.

Whether in the oil field or in transport, you can count on the proven performance of Themec linings.

VACUUM TRAILER LININGS FOR RELIABLE MUD AND BRINE SERVICE

Hauling residual mud or brine fluids from drilling and fracking operations requires a very heavy-duty trailer lining to prevent corrosion, wear or possible contaminant leaks.

Specialized Tnemec linings have been designated for this critical purpose and are widely used by industry fabricators, coatings applicators and oil companies.
